EndNote 2025 key features

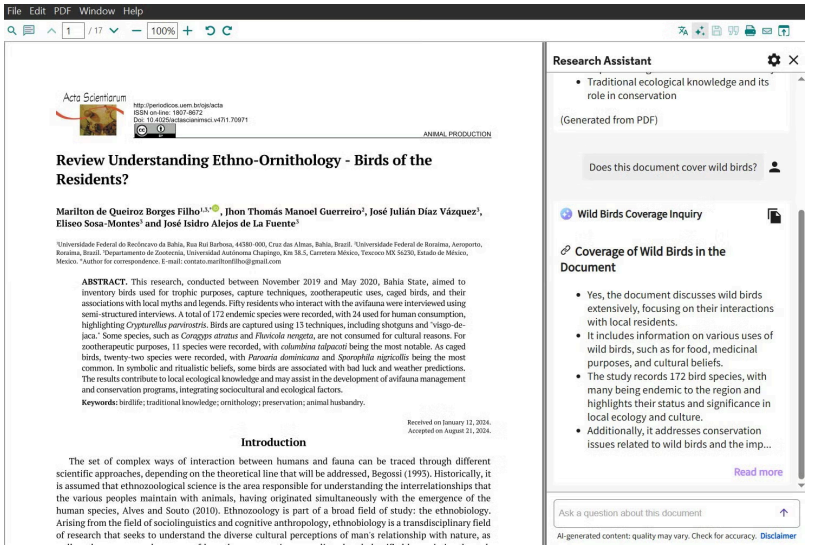
Meet the AI-powered EndNote Research Assistant - your smartest sidekick yet.
Start leveraging all new AI features exclusive to EndNote 2025. EndNote Research Assistant transforms your document into an interactive experience so you can understand a paper and unlock global knowledge in your library faster. Enjoy all the features of EndNote 2025 and assemble your work with precision and speed.

EndNote Research Assistant

Chat with your document: Ask questions in plain language and AI delivers instant answers sourced directly from the paper for greater accuracy.

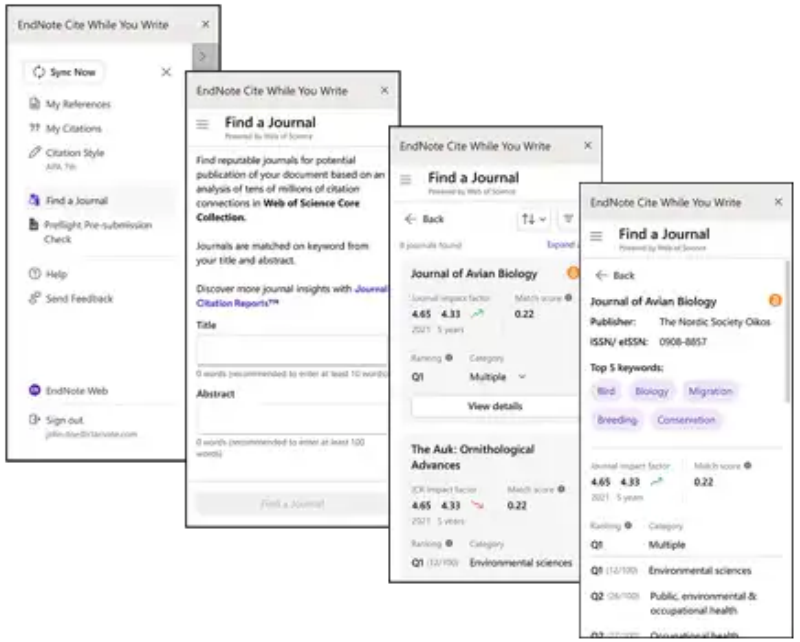
Summarize research: Identify the main points of a document with AI-enabled Key Takeaways or summarize selected sections of text.

Translate on the spot: Break through language barriers with built-in translation. Translate a full PDF or selected sections of text.



Find a Journal

EndNote's Find a Journal is an enhanced machine-learning publishing tool available directly in the industry-leading Cite While You Write plugin. Get help finding the best journal match for your work using key elements of your manuscript.

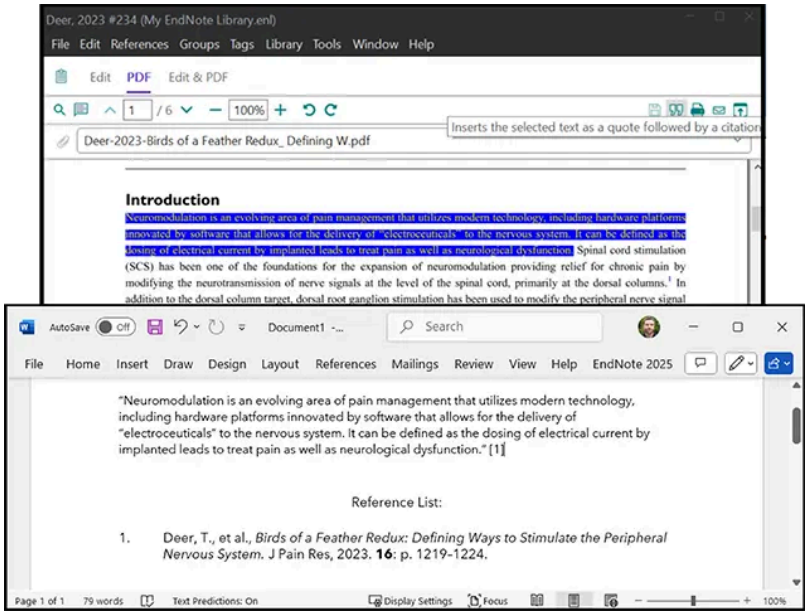


More updated citation tools and features.

EndNote 2025 includes several additional enhancements designed to streamline your research and writing process further.

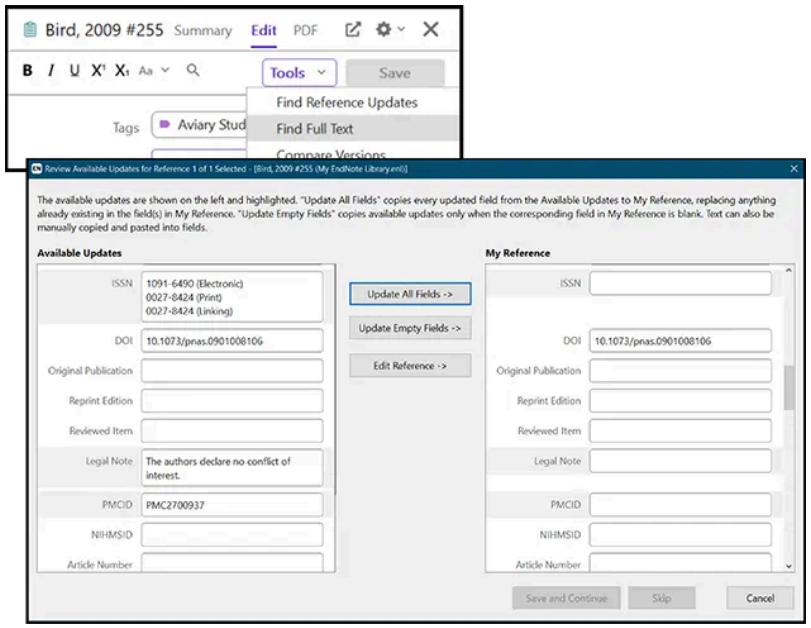
Cite from PDF

Efficiency and usability are key when writing a research paper. EndNote 2025 lets you quickly insert a highlighted quote from a PDF and its corresponding citation into your document with a click of a button.



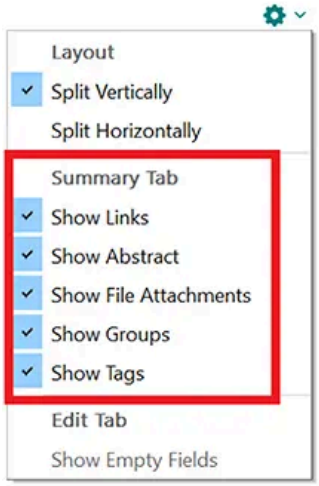
Find Reference Updates and Find Full-Text improvements

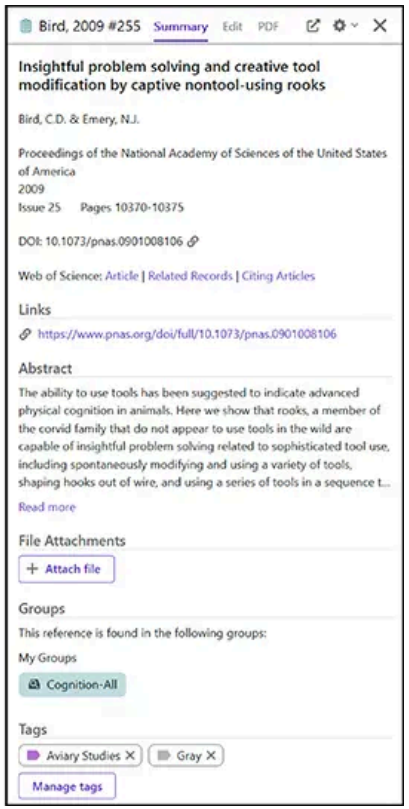
Enhance the credibility and reliability of your work by retrieving full-text articles and updating your reference details, ensuring references are correct and complete.

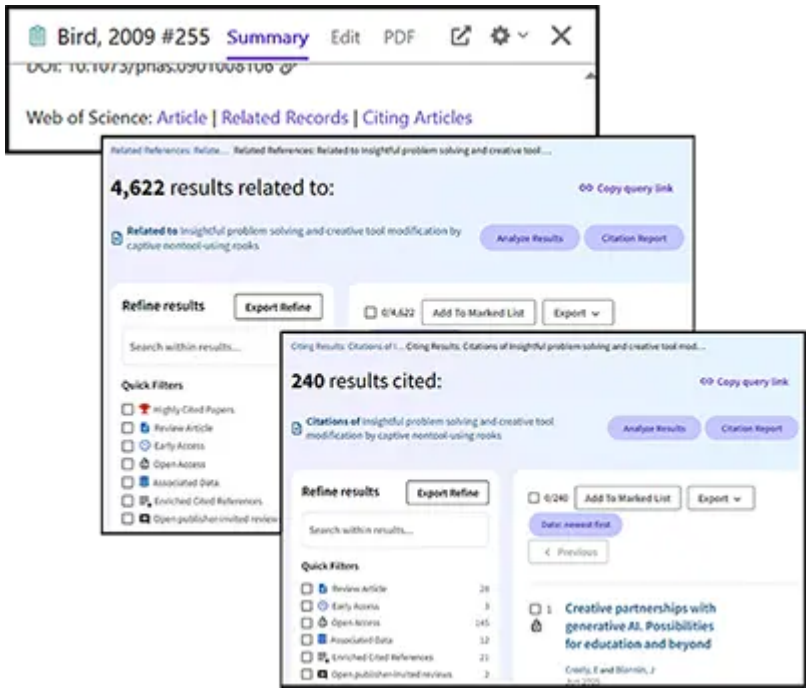


Summary panel redesign

Easily see the important details of each article in an easy-to-read format with an organized summary of your records.





Web of Science citing articles and related records


Web of Science is the world's most trusted citation database. With EndNote 2025, you can curate a more comprehensive reference library by viewing articles highly relevant to your work and finding papers that have cited your references.
